## Foreword

The data presented in this report provide facts about the extent to which local, state, and national governments commit resources to public education. As one might expect in a nation as diverse as the United States—with respect to economics, geography, and politics—the level of commitment to education varies on a state-by-state basis. Regardless of these variations, improvements in public education can be measured by summary statistics. Thus, NEA Research offers this report to its state and local affiliates as well as to researchers, policy makers, and the public as a tool to examine public education programs and services.

Part I of this report—*Rankings 2016*—provides state-level data on an array of topics relevant to the complex enterprise of public education. Since the 1960s, Rankings has presented facts and figures useful in determining how states differ from one another—or from national averages—on selected statistics. In addition to identifying emerging trends in key economic, political, and social areas, the state-by-state figures on government financing, state demographics, and public schools permit a statistical assessment of the scope of public education. Of course, no set of tables tells the entire story of a state’s education offerings. Consideration of factors such as a state’s tax system, provisions for other public services, and population characteristics also are needed. Therefore, it is unwise to draw conclusions based solely on individual statistics in this report.

Part II of this report—*Estimates 2017*—is in its 72nd year of production. Estimates provides data tables projecting public school enrollment, employment and compensation of personnel, and finances, as reported by individual state departments of education. Not surprisingly, interest in the improvement and renewal of public education continues to capture the attention of the nation.

Part III of this report—*National Trends 2007–17*—presents summary data of national trends in student enrollment and attendance, staff salaries, sources of school funding, and levels of educational expenditures in the previous ten years. Such trends at the national level have been based on data reported state by state.

Public education in the United States is a joint enterprise between local, state, and federal governments. Yet, progress in improving public education stems primarily from the efforts of state education agencies, local districts, and individual schools. These public organizations deserve credit for recognizing that spending for education needs to be acknowledged as an investment in our nation’s most valuable resource—students. Similarly, this publication represents a collective effort that goes well beyond the staff of the National Education Association. Individual state departments of education and the NEA’s state affiliates participate in collecting and assembling the data shown here. As a result, the NEA appreciates and acknowledges the cooperation it receives from all those whose efforts make this publication possible.

# **Executive Summary**

NEA Research collects, maintains, and analyzes data on issues and trends affecting the nation's public education systems and their employees. This report, *Rankings of the States 2016 and Estimates of School Statistics 2017*, contains data based on information from state departments of education and other, largely governmental, sources. Significant highlights of the report are below.

## **Part I. Rankings 2016 Highlights**

### **Population**

From 2015 to 2016, the total U.S. resident population increased by 0.7 percent. States that experienced the greatest percentage gains in population were Utah (2.0%), Nevada (2.0%), Florida (1.8%), Idaho (1.8%), and Washington (1.8%).

Six states experienced population declines: West Virginia (-0.5%), Illinois (-0.3%), Connecticut (-0.2%), Vermont (-0.2%), Wyoming (-0.2%), and Pennsylvania (-0.1%).

The total U.S. resident population increased by 8.5 percent during the decade from 2006 to 2016. The District of Columbia (25.5%), North Dakota (21.9%), and Texas (20.2%) experienced the greatest percentage gains in population over that 10-year period.

### **Enrollment and Attendance**

In fall 2015, U.S. public school enrollment was 49,831,699, up 0.3 percent over fall 2014. The largest percentage enrollment changes from fall 2014 to fall 2015 were in the District of Columbia (6.6%), Hawaii (2.4%), and Utah (2.1%).

Nineteen states experienced declines in student enrollment in fall 2015. The greatest declines were in Vermont (-4.9%), Connecticut (-1.2%), and New Hampshire (-1.2%).

The number of students in average daily attendance (ADA) increased by 0.4 percent, from 47,114,969 in 2014–15 to 47,309,516 in 2015–16.

### **High School Graduates**

A total of 3,347,221 students graduated from high school in 2015–16, up 1.1 percent from 3,309,762 in 2014–15.

### **Classroom Teachers**

There were 3,131,326 teachers in 2015–16. Texas (347,351), California (276,322), and New York (208,682) represented the largest numbers of teachers, while the District of Columbia (4,661) and Vermont (6,211) accounted for the smallest numbers.

The average number of students enrolled per teacher was roughly the same at 15.9 for 2014–15 and 2015–16. The highest number of students enrolled per teacher in fall 2015: Nevada (25.7), Arizona (23.8), and Utah (22.9). States with the lowest student-teacher ratios were Vermont (11.7), New Jersey (11.9), and Maine (12.1).

## **Teacher Salary**

The U.S. average public school teacher salary for 2015–16 was \$58,353. State average teacher salaries ranged from those in New York (\$79,152), California (\$77,179), and Massachusetts (\$76,981) at the high end to South Dakota (\$42,025) and Mississippi (\$42,744) at the low end.

The U.S. average one-year change in public school teacher salaries from 2014–15 to 2015–16 was 1.3 percent. The largest one-year decrease was in Arizona (-0.5%), and the largest one-year increase was in California (4.2%).

## **School Revenue**

School funding continues to be state oriented. In both 2014–15 and 2015–16, 45.8 percent of public school revenue came from state funds, closely followed by local receipts (45.1% then 45.3%). Federal funds constituted 9.0 percent and 8.9 percent, respectively, of K-12 education revenue.

## **Expenditures per Student**

The U.S. average per-student expenditure in 2015–16 fall enrollment was \$11,787. States with the highest per-student expenditures: Vermont (\$23,557), New York (\$21,606), and the District of Columbia (\$21,297). Idaho (\$6,538), Utah (\$6,843), Indiana (\$7,538), and Arizona (\$7,566) had the lowest per-student expenditures.

## **Part II. Estimates 2017 Highlights**

### **Enrollment**

Public school enrollment is expected to increase by 0.2 percent from 2015–16 (49,831,699) to 2016–17 (49,906,826). Enrollment in elementary grades is expected to rise by 0.3 percent, whereas secondary classes are expected to decrease by 0.1 percent. Public school enrollment anticipated during the 2016–17 school year represents the 32nd consecutive increase since 1985–86.

### **High School Graduates**

A total of 3,390,871 students are expected to graduate from high school in 2016–17, up 1.3 percent from 3,347,221 in 2015–16.

### **Instructional Staff**

The total number of instructional staff should increase by 0.1 percent from 3,601,396 in 2015–16 to 3,605,886 in 2016–17.

### **Classroom Teachers**

The number of public school classroom teachers should grow by 0.2 percent from 3,131,326 in 2015–16 to 3,136,388 in 2016–17.

## **Instructional Staff and Classroom Teacher Salaries**

Based on trends, the NEA estimates that the average salary of instructional staff will increase from \$60,205 in 2015–16 to \$60,840 in 2016–17, a gain of 1.1 percent. Classroom teacher salary for 2016–17 will increase by 1.0 percent over 2015–16, from \$58,353 to \$58,950.

## **School Revenue**

State governments still continue to provide the largest share of public school financial support; with their contributions estimated at 46.0 percent for 2016–17, up 0.2 percent from 45.8 percent in 2015–16. For 2016–17, the federal government’s contribution to public elementary and secondary school revenues is expected to be 8.4 percent, versus 8.9 percent in 2015–16.

## **Student Expenditures**

Expenditures per student in fall enrollment should increase by 1.7 percent to \$11,984 in 2016–17, up from \$11,787 in 2015–16. This compares with a 1.8 percent increase in total current expenditures.

# **Part III. National Trends 2007-17 Highlights**

## **School Districts**

The number of school districts has increased by 3.1 percent, from 15,509 in 2006–07 to an estimated 15,986 in 2016–17. Of the 15,986 school districts estimated for 2016–17, 15,777 (98.7%) are operating school districts.

## **Fall Enrollment**

Public school enrollment has registered a 2.2 percent increase for the years 2006–07 (48,854,085) through 2016–17 (49,906,826). Enrollment in elementary schools has gained by 4.3 percent; enrollment in secondary schools has decreased by 1.1 percent during the 10-year period.

## **Average Daily Attendance**

The total number of students measured by average daily attendance (ADA) has increased by 3.9 percent within the 10 years, from 45,773,864 in 2006–07 to 47,573,761 in 2016–17.

## **High School Graduates**

An estimated 3,390,871 high school students will graduate in 2016–17, representing an increase of 16.7 percent from 2,905,191 graduates in 2006–07.

## **Instructional Staff**

The total instructional staff in 2016–17 is estimated at 3,605,886, a decrease of 9,559, or 0.3 percent, compared to 3,615,445 in 2006–07.

## **Classroom Teachers**

The number of K-12 classroom teachers is estimated to be 3,136,388 in 2016–17, a decrease of 0.6 percent compared to 3,155,794 in 2006–07. The elementary school classroom teaching staff has experienced a net increase of 5.3 percent since 2006–07, while the number of secondary school teachers has decreased 8.2 percent.

## **Instructional Staff and Classroom Teacher Salaries**

The national average instructional staff salary for 2016–17 is estimated to be \$60,840, representing a gain of 15.6 percent since 2006–07 (\$52,633). The U.S. average classroom teacher salary is estimated to be \$58,950 for the 2016–17 school year, an increase of 15.2 percent over the figure of \$51,160 in 2006–07.

## **Inflation-adjusted Salaries**

There are significant differences between the average salaries in current versus constant dollars. The current-dollar increases over the years since 2006–07 appear substantial for both instructional staff and classroom teachers. But, when the effects of price inflation are taken into account, the average classroom teacher salary has actually decreased by \$1,823, or 3.0 percent, while the average salary for instructional staff has decreased by \$1,683, or 2.7 percent, over the 10-year period.

## **Total Receipts**

Total revenue and nonrevenue receipts for 2016–17 are estimated to be \$698.2 billion, an increase of 16.7 percent compared with 2006–07. When adjusted for inflation, total receipts have decreased an estimated 1.8 percent over the decade.

## **Revenue Receipts**

From 2006–07 to 2016–17, school revenue receipts have increased 16.3 percent. Adjusting for inflation in 2006–07 dollars, public school revenues have decreased 2.1 percent over the decade. During this 10-year period, the percentage of state receipts has ranged between 44.1 and 48.3 percent of total revenue receipts, constituting the largest source of public school funds. State education resources have increased by 12.3 percent from 2007 to 2017, but have decreased 5.4 percent when adjusted for inflation.

## **Total Expenditures**

The total amount to be spent for current expenditures, capital outlay, and interest payments are expected to increase 23.1 percent from \$561.6 billion in 2006–07 to \$691.6 billion in 2016–17. Adjusting for the effects of price inflation, the change in total expenditures is estimated at 3.7 percent over the decade.

## **Current Expenditures**

Current expenditures for public schools are expected to increase from \$475.8 billion in 2006–07 to \$598.1 billion in 2016–17, a 25.7 percent increase. Current expenditures have grown by 5.8 percent during the 10 years in inflation-adjusted dollars.

## **Current Expenditure per Student in Enrollment**

Over the last decade, the average per-student expenditure has risen by \$2,244, or 23 percent from \$9,740 to \$11,984. After inflation adjustment, the expenditure per student in enrollment has increased by \$414, or 3.6 percent.

## Technical Notes

The first part, *Rankings 2016*, of this publication contains ranking statistics of public elementary and secondary schools for the 50 states and the District of Columbia. The education data are the most recent actual or estimated data collected primarily from state departments of education. All tables on schools and students, teachers and instructional staff, school revenues, and education expenditures have been updated from the previous edition.

The second part, *Estimates 2017*, presents public school data for the 50 states and the District of Columbia based on survey responses of state education agencies. State department of education contacts are asked to provide estimated data for the current year (2016–17) and revisions to four years of historical data, as necessary. Therefore, data for school years 2012–13 through 2015–16 were subject to revision as a result of the 2016 surveys. The estimated data featured in this report are for the current school year (2016–17) and the previous school year (2015–16). These data are provided on a state-by-state basis. All figures represent projections by state education agencies—or NEA Research—as of September 2016.

Twice a year, NEA Research submits current-year estimates of educational statistics to each state’s Department of Education for verification or revision. The figures are generated primarily using regression analyses, which are standard statistical techniques designed to make predictions for the current year using numerical data from prior years. Only if an education department does not replace these projections with its own estimated data does the NEA use regression-generated figures in this report.

The last part, *National Trends 2007–17*, highlights summary public school statistics for the United States over the last decade on students, teachers and instructional staff, school revenues, and education expenditures.

NEA Research has calculated salary estimates using American Community Survey data for several states that have not reported such data for some years.

Note that throughout this publication school years may be indicated in several equivalent ways. More specifically, the school year from September 2015 through June 2016 may be shown as “2015–16,” or it may be indicated by shorthand as “2016,” or “16.”

Also note that some totals in certain tables may not sum exactly because of rounding. Dollar values are expressed in “current dollars” unless otherwise noted.

Consumer Price Index for all Urban Consumers is applied for computation of constant-dollar salary, revenue, and expenditure data.

## Glossary

**Average Daily Attendance (ADA):** The aggregate attendance of a school during a reporting period divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily attendance for groups of schools having varying lengths of terms is the sum of the average daily attendances obtained for the individual schools.

**Average Salary:** The arithmetic mean of the salaries of the group described. This figure is the average gross salary before deductions for Social Security, retirement, health insurance, and so on.

**Capital Outlay:** An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings, improvements of grounds, construction of buildings, additions to buildings, remodeling of buildings, or initial, additional, and replacement equipment.

**Classroom Teacher:** A staff member assigned the professional activities of instructing pupils in self-contained classes or courses or in classroom situations. The number of classroom teachers is usually expressed in full-time equivalents.

**Current Expenditures:** The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs.

**Current Expenditures for Other Programs:** Current expenses for summer schools, adult education, post-high-school vocational education, personnel retraining, and community services; services to private school pupils, community centers, recreational activities, and public libraries, and so on, when operated by local school districts and not part of regular public elementary and secondary day-school programs.

**Debt:** The major portion of all state and local government debt constitutes long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt (*i.e.*, obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes).

**Education:** The provision or support of schools and other education facilities and services.

**Elementary School:** A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

**Enrollment:** A cumulative count of the number of pupils registered during the entire school year. New entrants are added, but those leaving are not subtracted.

**Expenditures:** All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures include only external transactions of a government and exclude noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

**Fall Enrollment:** The count of the pupils registered in the fall of the school year, usually in October.

**Full-Time Equivalent Employment:** A computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the “part-time hours paid” by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

**General Expenditures:** All expenditures of a government other than utility expenditures, liquor store expenditures, and insurance trust expenditures.

**General Revenue:** All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

**General Sales Taxes:** Sales or gross receipts taxes that are applicable, with only specified exceptions, to all types of goods and services or all gross income, whether at a single rate or at classified rates.

**Health:** Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agency) are included.

**High School Graduate:** A person who receives formal recognition from school authorities for having completed the prescribed high school course of study; excludes equivalency certificates.

**Hospitals:** Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

**Household:** A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

**Individual Income Tax:** Taxes on individuals measured by net income and taxes imposed on special types of income (*e.g.*, interest, dividends, and income from intangibles).

**Instructional Staff:** Full-time equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, instructional staff

includes all public elementary and secondary (junior and senior high) day school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education, includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations, and farms.

**Interest on Debt:** Annual expenditures to pay interest only on long-term debt.

**K-12:** Kindergarten through 12th grade. Used for convenience of abbreviation in the Rankings tables; comprises “Elementary School” and “Secondary School” as defined in this glossary. Thus, as is the case for “Elementary School,” K-12 here may include preschool and/or kindergarten but only if it is an integral part of an elementary school or a regularly established school system.

**Live Births:** Number of births in the United States.

**Membership:** A count of the number of pupils “belonging” to a school, whether present or absent, on a day when school is in session.

**Noninstructional Staff:** In local schools includes administrative and clerical personnel, plant operation and maintenance employees, bus drivers, and lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria, clerical, and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

**Nonoperating School District:** A school district that does not provide direct instruction for pupils but contracts with or pays tuition to other districts

**Nonrevenue Receipts:** The amount received by local education agencies from the sale of bonds and real property and equipment, loans, and proceeds from insurance adjustments.

**Operating School District:** A school district that directly provides instruction for pupils by hiring its own staff.

**Personal Income:** State personal income is the current income received by residents of the state from all sources, including transfers from government and business but excluding transfers among persons. It is a before-tax measure. The total includes both monetary and nonmonetary income of individuals and income received in kind. It also includes the investment income of nonprofit institutions serving individuals as well as the investment income of private trust funds and private noninsured welfare funds.

**Property Taxes:** Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (*i.e.*, relating to property as a whole, real and personal,

tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (*i.e.*, on selected types of property, such as motor vehicles or certain or all tangibles, subject to rates that are not directly related to rates applying to general property taxation).

**Public Welfare:** Support of and assistance to eligible persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditures for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

**Range:** The difference between the highest and lowest values in a group of data.

**Resident Population:** In addition to those who are residents of an area, includes armed forces personnel who are stationed in the area.

**Revenue:** Revenue receipts for public school purposes derive from three main sources:

*Local.* Local, intermediate, and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or Social Security on behalf of public school employees, for the purchase of materials for distribution of local school districts, and so on. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

*State.* Revenue receipts from state sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or Social Security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

*Federal.* Revenue receipts from federal sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for school lunch and milk programs, for educating American Indians in local public schools, and money derived from federal forest reserves and federal oil royalties.

**Revenue from Own Sources:** All revenue of a government (taxes and other) except intergovernmental.

**School District:** An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are “local basic administrative unit” and “local education agency.”

**School-Age Population:** Population age 5 through 17, inclusive (excluding armed forces abroad).

**Secondary School:** A school comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

**Student-Teacher Ratio:** The number of students in the fall enrollment divided by the number of classroom teachers.

**Taxes:** Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts the collecting government retains are treated as its tax revenue. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

**Total Expenditures:** Includes all current expenditures, capital outlay, and interest on the school debt.

**Total Revenue Receipts:** Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; and so on. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

## State Notes for Rankings and Estimates

The NEA recognizes that each state's department of education (DOE) has its own system of accounting and reporting for state executive and legislative branch purposes. As a result, it is not always possible to obtain completely comparable data for every state. For this reason, NEA Research encourages each state DOE to include any clarifying information that is necessary for a proper interpretation of the data supplied. In response, state education departments have provided clarifying and explanatory information. NEA Research has calculated salary estimates using American Community Survey data for the states that have not reported such data for some years.

**ARIZONA:** Salary estimates have been calculated from American Community Survey for school years since 2011–12.

**CALIFORNIA:** California has more than 500 schools that cannot be categorized as either “Elementary” or “Secondary.” Therefore, “Elementary” personnel include teachers from elementary, middle, junior high, and special education schools, and teachers from county and district offices not assigned to a school site. “Secondary” personnel are deemed to include teachers from senior high, continuation, alternative, community day, juvenile hall/court, and K-12 schools.

The California legislature determines the amount of property taxes used to fund schools. Local school boards do not have authority to raise any revenue for district instructional programs. The enrollment projections do not include ungraded enrollment.

**DELAWARE:** For fiscal and reporting purposes, the state treats charter schools as if they were public school districts without geographic boundaries.

**GEORGIA:** State revenue includes “on behalf” revenues (health insurance and retirement premiums) and “state schools” revenues. Total current expenditure includes “on behalf” payments (health insurance and retirement premiums) and “state schools” expenditures.

**IDAHO:** Salary data may include extra-duty pay.

**ILLINOIS:** Salary data may include extra-duty pay. School districts report total salary as the amount reported to the Teacher Retirement System.

**IOWA:** Starting from 2006 the average teacher salary has been calculated according to NEA instructions. Numbers for previous years had not been calculated this way.

**KANSAS:** The Kansas State Board of Education includes in its average teacher salary three separate forms of compensation: base teaching salary, supplemental salary, and fringe benefits. Kansas does not keep data on teacher gender breakdown or on the differences in salaries among “elementary” and “secondary” schools.

**LOUISIANA:** With the exception of average teacher salary data, the scope of Louisiana's data reported for 2001–2002 and subsequent years was expanded to encompass the public school agencies beyond its regular city/parish school districts. This revision makes NEA data more comparable to what Louisiana has historically reported to NCES.

1. Effective 2010–2011, the single-school Louisiana School for the Visually Impaired (LEA 305) closed as a separate agency; its school transferred to the (renamed) LA Schools for the Deaf and the Visually Impaired (LEA 304), making this a two-school agency.
2. Effective 2007–2008, students enrolled in schools operated by the Office of Youth Development (previously within the LA Department of Corrections) were reported within the LDOE student data system; the OYD included in the above district/agency counts. Effective 2008–2009, OYD was re-designated the Office of Juvenile Justice (OJJ).
3. RSD = Recovery School District. The state-operated RSD schools are mainly in Orleans Parish; however, effective 2010–11 some were in other parishes. The remainder of the RSD (within Orleans and other parishes) consists of contractor-operated type 5 charter school agencies. Each agency may have multiple schools.

The Louisiana average salaries for instructional staff and classroom teachers are calculated using all regular salaries and bonuses relating to the assigned duty or duties performed by each applicable school district or agency employee. Overtime payments, stipends, and benefits are excluded.

**MAINE:** Enrollment figures only include students attending public schools and do not include those students attending private schools at public expense. Average teacher salaries since 2008 do not include payments by the Maine Department of Education to bring teachers paid below \$30,000 up to the \$30,000 minimum salary.

**MICHIGAN:** The data in this report can be found at <http://www.michigan.gov/cepi>. The average salary is determined by taking the total salaries for all full-time K-12 instructional professional staff and dividing that figure by the number of full-time K-12 staff.

The Michigan Department of Education (MDE) does not collect aggregate daily totals on attendance. A definition of “average daily attendance” (ADA) is written in Michigan state law as 92 percent of the total reported enrollment in Michigan’s school districts.

The MDE’s “elementary” enrollment was computed as K-6 and “secondary” enrollment as grades 7-12. Special education was divided into proportions of 69.5 percent “elementary” and 30.5 percent “secondary.” During fiscal 1994–95, 40 public school academies were established. They began operation in fiscal 1996–97. “School academies” are charter schools that for certain purposes are counted as school districts.

Legislation passed in 1994 changed the major source of revenue from local to state funds.

**MINNESOTA:** Short-term debt is included in the total current expenditure figure. Minnesota’s alternate-year teacher contract negotiations result in understated salaries for off years because, in the absence of accurate data, the school districts often report data from the prior year. Consequently, the Minnesota Department of Children, Families, and Learning no longer will

supply salary estimates for off years. The NEA will submit its own estimates for those years. The total school district data include charter school districts.

**NEBRASKA:** The number of classroom teachers and the data on teacher salaries do not include substitute teachers. “Elementary” enrollment data are considered to comprise grades preK-8. Total number of classroom teachers consists of elementary (elementary and junior high/middle school and secondary (secondary).

**NEW MEXICO:** A new reporting system was introduced for 2006–07; therefore, comparisons to prior years may have anomalies.

**NEW YORK:** New York’s teacher salary data are medians, not averages (arithmetic means).

**NORTH DAKOTA:** The number of teachers reported in this table do not include tutors and small group instructors and may differ from the teacher counts reported by other publications, such as Common Core Data, released by NCES.

**OHIO:** Total number of teachers reported includes teachers whose gender was not reported.

**OREGON:** Where applicable, “average teacher salary” includes the contract amount plus 6 percent for the employer portion of retirement contributions. The number of instructional staff includes Regional Service District staff.

**SOUTH CAROLINA:** The number of school districts includes two special districts established by the General Assembly. ADA figures include kindergarten students reported at half-count.

**SOUTH DAKOTA:** Student enrollment numbers are not consistent with Common Core Data nonfiscal data collections of the National Center for Education Statistics. Common Core Data requires submission of data for all public schools and also for state-operated schools (*e.g.*, schools for the deaf, visually handicapped, and corrections).

**TEXAS:** The number of “elementary” students includes the number of students in early education through grade 6. The number of “secondary” students includes students in grades 7-12.

**VERMONT:** The substantial drop in Vermont’s local revenues and increase in state revenues reported in FY 05 and projected for FY 06 was caused by a statutory change. The Vermont legislature passed Act 68 which, among other things, changed the local property tax component of education revenue into a state property tax. Revenue data do not include revenues to run the state’s board of education or department of education.

Expenditures for food services are included in current expenditures. Students who attend independent schools at public expense are not included in the student enrollment count. The expenditures associated with those students are likewise not included in current expenditures summaries.

**WASHINGTON:** The amount of interest on school debt does not include interest derived from capital projects funds. Student enrollments include high school students who are enrolled in community colleges and technical colleges.

Associated Student Body Fund revenues and expenditures are excluded from this report. Federal food reimbursements are not deducted from food service expenditures.
